About Us

WE ARE Bright Future Asset

Our approach to active investment management is based on an investment process that fully integrates sustainability analysis into our decision-making and is focused on long-term performance. We construct portfolios of sustainable instruments with the confidence derived from our deep research and analysis.

Our Mission

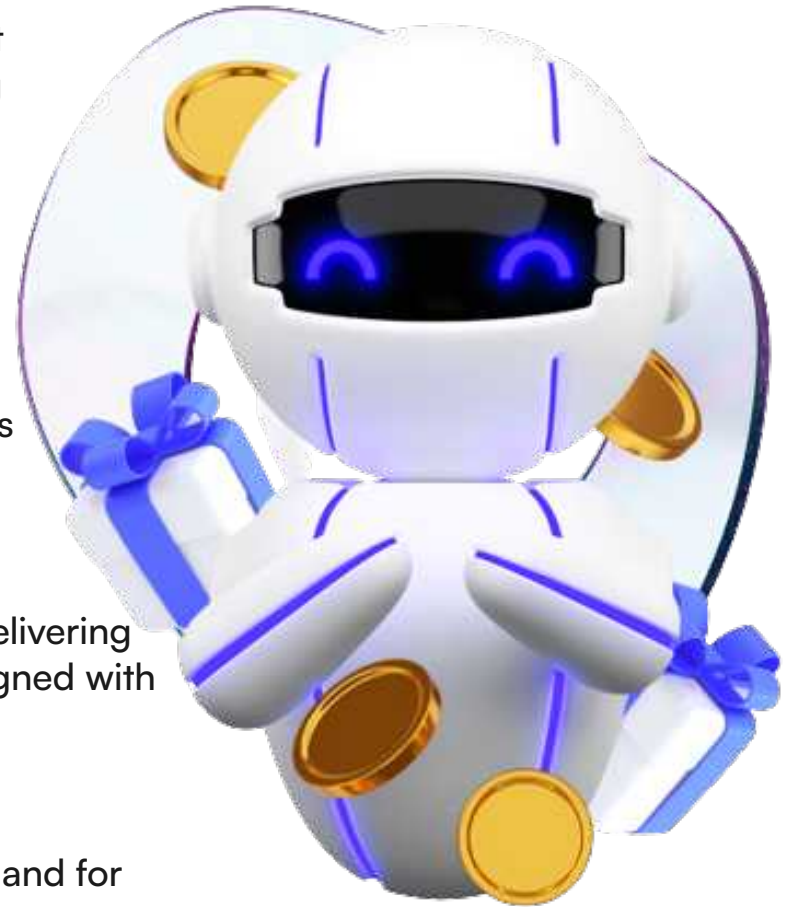

To deliver superior investment performance by consistently taking a long-term view and fully integrating sustainability research within a rigorous framework of traditional financial analysis.

Our Values

We are committed to providing exceptional client service — above all by delivering superior long-term performance* and by ensuring that our interests are aligned with those of our clients.

Our Vision

Our vision is to see long-term, sustainable investing become best practice, and for sustainable capitalism to become the enduring economic model.

Affiliate Program

Each user receives income from the investments made by their referrals. Invite your partners to receive a referral bonus of 10% on each deposit made by your downliner.

Refer & Earn 10%

This level of our affiliate program is 10% of the investment made by your partner who has registered directly through your referral link. The earnings are accrued in the system from which the partner made a deposit.

Our support team are always available to respond to your query

Demo account

You are not sure yet? we have a demo account to boost your confidence

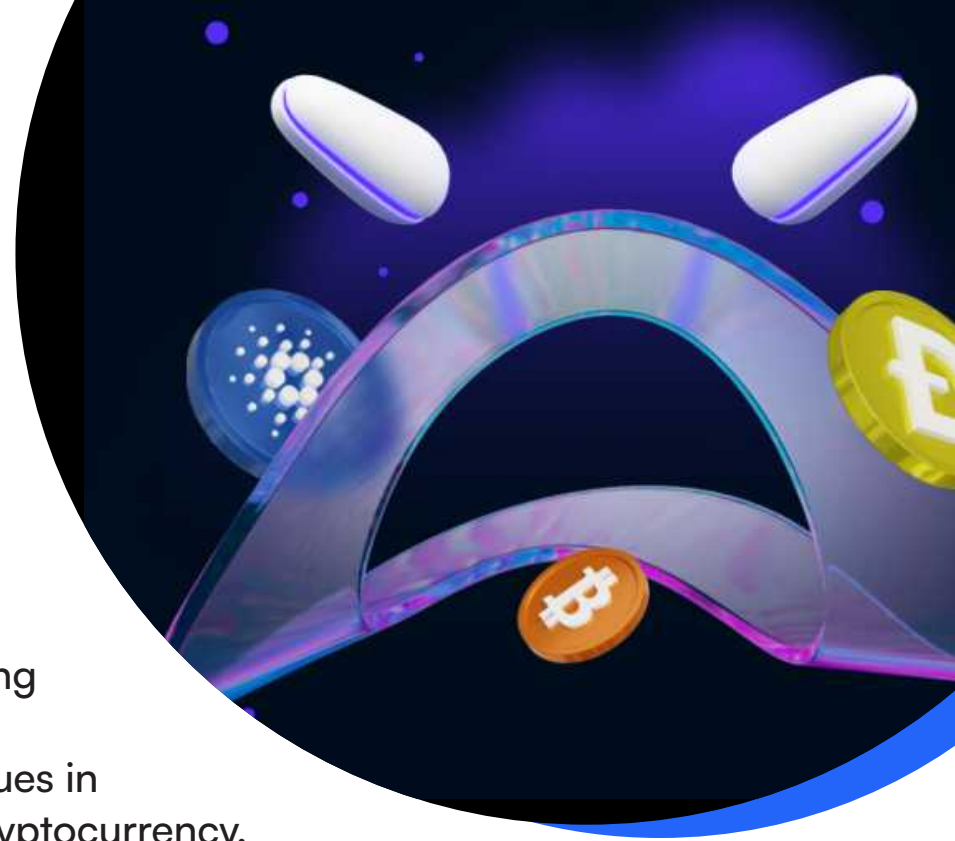

Award winner

We are pace setters in this industries an have lots of award in that regard

About company

Bright Future Asset has played an integral role in the development of sustainable investing and in demonstrating the long-term commercial benefits of this approach. As Investment Service Providers, we have placed the acquisition of knowledge at our core ever since our first director said “every investment strategy should be research-driven”. We were one of the first asset managers to pioneer investing in emerging markets, the first to take sustainability investing seriously, and one of the first to adopt quantitative investing using advanced research techniques. Now we integrate sustainability investing as standard, while constantly developing new techniques in a range of fields including factor investing, equity trends and cryptocurrency.

We aim to enable our clients to achieve their financial and sustainability goals by providing superior investment returns and solutions. We do this by offering a compact, client-oriented and distinctive range of actively managed investment strategies and investment solutions. And so our mission remains to use a research-based, quality-driven process to produce the best possible long-term results for our clients. We uniquely integrate fundamental, quantitative and sustainability research. Portfolio managers use the insights from all three, allowing them to make better-informed investment decisions. Risk management is essential, which is why we say we will always believe in long-term, sustainable capital growth.
